GOVERNMENT GAZETTE

Conditions of Acceptance of Copy

FAILURE to comply with any of the following conditions will result in the rejection of copy, and no responsibility can be accepted if such rejection should affect any date contained in such copy or any requirement of publication on a specific date.

Persons drafting any kind of notices are strongly advised to follow the guidance offered in—

- (a) the Instructions Relating to the Drafting and Typing of Legislation (Attorney-General's Circular 1 of 1978); and
- (b) the Manual of Style for the Drafting and Preparation of copy published by Printflow (Private) Limited;

which two booklets are intended for complementary use.

In these conditions, other than where a particular kind of copy is specified, "copy" means copy for all matter contained in the *Gazette* itself and for subsidiary legislation issued as supplements to the *Gazette*.

1. (1) Other than by prior arrangements, only original typing is accepted.

(2) Carbon-copies are not normally acceptable, other than in cases where the original typing has to be legally retained, elsewhere, as, for example, in the case of a proclamation.

(3) Computer print-outs are not accepted automatically, as discussion may be necessary with regard to the extra time and costs involved.

2. (1) All copy must be clear and legible, and there must be double or one and a half spacing between the lines.

(2) Any corrections or alterations made by the originator, must be clearly effected in blue or black ink, using editorial marks—not proof-reader's marks:

Provided that any copy containing extensive alterations will be rejected.

3. (1) Copy must appear on one side only of each sheet of paper.

(2) Except as is provided in subsection (2) of section 8, paper must not exceed 210 millimetres in width.

(3) If copy comprises two or more sheets of paper, all sheets must be numbered consecutively, in arabic figures, preferably in the top right-hand corner.

(4) Where any matter is added after the copy has been prepared, and such additional matter results in one or more sheets being inserted between those already numbered, all sheets must be renumbered from there onwards—not, for instance 7, 7b, 8, *et cetera*.

4. Photographic copy or copy produced on a duplicating machine may be accepted if it is abundantly clear.

5. (1) Should any copy—

- (a) exceed 10 pages of double-spaced typing on size A4 paper; or
- (b) contain tabular or other matter which involves complicated setting; it will be classed as "lengthy" copy, and will be required to be submitted not less than 21 days before the date of closing for the *Gazette* in which it is to be published.

(2) Lengthy copy may be accepted at less than 21 days' notice if—

- (a) the work involved is of a straight forward and non-tabular nature; and
- (b) the total volume of work on hand for the time being permits its acceptance.

6. Notwithstanding anything to the contrary contained in these conditions, any copy—

- (a) which is of national importance, and which is originated as a matter of urgent necessity, may, by prior arrangement, be accepted late for the current week;
- (b) may, due to shortage of staff or to technical considerations, be delayed until conditions permit its processing.

7. Copy must not be submitted as part of a letter or a requisition. It must appear on a separate sheet of paper, on which there is no instruction or other extraneous matter.

8. (1) In cases where notices have to be published in tabular form, copy must be drafted exactly as it is to appear. If printed forms for any such notices are unavailable, advertisers must prepare their own forms. While it is not necessary to include the preamble, the box-headings must be there, and, where applicable, the number of the form; for example, "Insolvency Regulations—Form 3".

(2) In the case of copy for tabular notices, the provision of subsection (2) of section 3 does not apply.

9. Copy for all advertisements, whether sent by post or delivered by hand, must be accompanied by a requisition or a letter which clearly sets out—

- (a) the name and address of the advertiser; and
- (b) the debtor's code number, if any; and
- (c) the required date or dates of publication.

10. If a typographical error occurs in the *Gazette*, it is rectified as soon as possible by a correcting notice without charge to the ministry or department concerned, subject to the following conditions—

- (a) that such error is reported to the editor within three months from the date of publication; and
- (b) that the relevant copy, upon re-examination, is proved to be abundantly clear; and
- (c) that the correction of such error is legally necessary.

(2) If a drafting error is not detected before publication, the originating ministry or department is required to draft its own correcting notice, take it to the Attorney-General for vetting and pay for such notice to be published.

(3) For the removal of doubt—

- (a) a typographical error is made by a typographer;
- (b) a typist's error is classed as a drafting error by reason of the fact that the officer responsible for drafting failed to check the typist's work.

GOVERNMENT GAZETTE

Submission of Copy for Government *Gazette* Statutory Instruments and Notices

IT is hereby notified, for general information, that it is necessary to draw attention to the "Conditions for Acceptance of Copy", which appears in every issue of the *Gazette*; and particularly the need to submit lengthy copy, in the case of Statutory Instruments, at least 21 days before the date of closing for the *Gazette* in which the notice is to be published.

During the past few months or so there have been many cases where urgent copy for subsidiary legislation, which requires the signature of the President or a minister to give it effect, and which is of national importance, has been sent in for publication in the *Gazette* after closing-time. Whilst I acknowledge that it is the duty of Printflow (Private) Limited to give certain notices special treatment, I am, however, of the view that a *Gazette* Extraordinary has tended to be a must rather than a matter of priority in respect of unwarranted delays of urgent copy.

While every effort will continue to be made to publish Extraordinaries on the required dates, copy must be submitted timeously so that it can be programmed into the printing-work-flow as soon as it is available.

H. MATINGWINA,
Gazette Editor.

List of hazardous work

Hazardous work in the Air Transport Industry comprises of activities involving handling and transportation of dangerous goods which are identified as such by the International Civil Aviation Organisation (ICAO) from time to time. These are classified in 9 categories as tabulated below:

Hazardous Activities/Tasks	Hazard Areas	Risk
1. Explosives: Transportation, packing, and packaging, freight forwarding of materials which have ability to rapidly detonate as a consequence of chemical reaction	Handling services Test beds	Causes catastrophic damage, injury or death through force, hazardous amounts of heat, light, sound, gas or smoke
1. Flammable gases: Transportation, packing, and packaging, freight forwarding of substances which have a vapour pressure of 300 kPa or greater at 50 degrees Celsius such as aerosols, compressed air, Butane, Ethane, Methane, Fertilizer ammonium solution, insecticides, fire extinguishers, lighters, Helium compounds and Nitrogen compounds	-Handling Services -Aircraft workshops	Poses serious risk due to their flammability, potential as asphyxiants, ability to oxidise and toxicity or corrosiveness to humans
3. Flammable liquids: Transportation, packing, and packaging, freight forwarding of liquids, mixtures of liquids or liquids containing solids in solution or suspension which give off a flammable vapour (have a flash point) at temperatures of not more than 60–65 degrees Celsius.	Handling services Test Beds Aircraft Hangar	Poses risk of injury and death due to their volatility, combustibility and potential in causing severe fires
4. Flammable solids: Transportation, packing, and packaging, freight forwarding of materials which, under conditions of encountered in transport, are readily combustible or may contribute to fire through friction, self-restrictive substances which are liable to undergo strongly exothermic reaction or solid desensitised explosives.	Handling Services Test Beds Hangar	Poses risk of injury and death due to their volatility, combustibility and potential in causing severe fires
5. Oxidizers/Organic peroxides: Transportation, packing and packaging, freight forwarding of substances which may cause combustion generally by yielding oxygen as a result of a redox chemical reaction. Organic peroxides are thermally unstable and may exude heat whilst undergoing exothermic autocatalytic decomposition	Handling Services Test beds Aircraft workshops	Poses risk of injury and death due to their combustibility and sensitivity to react dangerously with other substances and cause damage to eyes.

7. Radioactive material: Transportation, packing, and material packaging, freight forwarding of any material containing radionuclides where both the activity concentration and the total activity exceeds certain predefined values such as radioactive ores, medical isotopes, Uranium hexafluoride, enriched Uranium Yellowcake, Density gauges and mixed fission products.	Entry/Exit security check points Handling Services	Emission of ionizing radiation causes severe risk to human health
8. Corrosives: Transportation, packing, and packaging, freight forwarding of any substances which by chemical action degrade or disintegrate other materials upon contact	Handling Services Aircraft workshops	Risk of severe damage when in contact with living tissue or, in the case of leakage, damage or destroy surrounding materials.
